

CBS Adventures Abroad

## Calder Glowac // Trondheim, Norway

### What about the program appealed to you the most?

I had wanted to visit Norway since I was young and found out I had family in Norway. I also had many places I wanted to see in Norway, and I wanted to see the Northern Lights. I got to visit multiple Norwegian cities including Tromso which is in the Arctic Circle. I also saw the Northern Lights multiple times; they are one of the most beautiful and incredible sights I have ever seen.

### What was your most memorable experience?

My most memorable experience was meeting my distant family who live in Norway. I was able to contact and find a time to meet my grandmother's cousin and his entire family. I spent a weekend with his family where they showed me where my family lived a hundred years ago.

### What did you learn or gain from your time abroad?

I gained an experience that I will never forget. This experience gave me confidence connecting with new people and stepping out of my comfort zone.

### Student Scoop

**Major:** Biology

**Program:** Fall semester in Trondheim, Norway

**Advice for CBS students looking to study abroad:** Find a location you are excited about and do everything you can to make it work. This might include determining which classes will transfer or extra time working to afford the time abroad, [but] all the difficulty in setting up study abroad is completely worth it.
