

CBS Adventures Abroad

Jordan Schmitting // Ireland

Why should CBS students go abroad?

A significant portion of CBS students are thinking about working in the healthcare industry. Being immersed in a foreign culture made me want to challenge myself to think about routine actions from a new perspective. In the healthcare industry, every patient's case is unique. That means getting into the habit of looking for ways to adapt through purposeful observation can prove to be a valuable skill.

What did you learn or gain from your time abroad?

Innovation and Imagination in Ireland is a unique course because it gives students some insight into the biological aspects of creativity. Those concepts are then applied to the business world. As a CBS student interested in making a career out of merging science with business, I couldn't imagine a better suited course for me.
