

CBS Adventures Abroad

## McLaren Curphy // Norway

### What did you learn or gain from your time abroad?

I learned about Norwegian culture and the ways that the Norwegian people manage their natural resources and live green. I also learned about and visited different Norwegian ecosystems, including a rainforest! I was able to talk to local university students while I was there and practice speaking with people from different cultural backgrounds and immerse myself into a society other than the one I was raised in.

### What advice do you have for CBS students looking to study abroad?

Look for a course that fits your interests and credit requirements, and go for it! Entering freshman year, I never pictured myself studying abroad so early in my academic career, but I am so happy that I did it. If it is something that you are even slightly interested, I recommend that you look further into it.
