

CBS Adventures Abroad

## Molleysa Yang // Thailand

### What did you learn or gain from your time abroad?

The course really opened my eyes to the impacts that one single action can cause. I gained an invaluable experience from doing this study abroad program. I learned about human trafficking, families, ways of life, education, and so much more.

### How did your time in CBS or at the University of Minnesota prepare you for your time abroad?

I was awarded with the Suzanne Ashmore Nelson Memorial Scholarship funded by Dr. Lolly Schiffman through the College of Biological Sciences. This generous contribution to CBS was used toward my study abroad making it all possible to go to Thailand. I was also a part of the Dean's Scholars Program within CBS, and all the lessons I've learned from it have prepared me to try achieving something I wouldn't have thought was possible.

### Student Scoop

**Major:** Biology

**Program:** Thailand, May-term

**Describe your experience in 5 words:**

Can't wait to go back!
